CONVERSION CHART

JUN 26 1946

FOR ESTABLISHING DEALER SELLING PRICES LYON STEEL SHOP EQUIPMENT UNDER OPA ORDER No. 11, MPR-188

All Prices Shown are FOB Factory

EXPLANATIONS

This conversion chart will supply you with additional information which you can use in connection with our new shop equipment net price list No. 361. mailed to you with our letter of April 30, 1946. This will simplify for you the establishing of your new ceiling selling prices under recent OPA price authorities on these products.

COLUMN 1—Catalog Page Number—For quick reference, this column shows the page number in your red cover Shop Equipment catalog No. 331, on which each product is illustrated.

COLUMN 2—Product Number—In this column we show the product number or description of each article in the same sequence of listing as is used in your net price list No. 361.

COLUMN 3—Original Net Price (List Minus 30%) —Prices shown in this column are net prices arrived at by taking 30% discount from the dealer list prices in effect in March 1942 when these product prices were "frozen."

COLUMN 4—New Net Price (Your Present Cost). Prices shown in this column are your present net prices, corresponding with the net prices shown in price list No. 361. These are the new increased prices authorized by OPA.

COLUMN 5—Net increase ($ & ¢ amount) you can add to your old ceiling prices (Column 4 less Column 3).
—Amount shown in this column is the net difference between your original cost and your new net cost. This is the amount which OPA authorizes you to add to your former ceiling selling prices.

COLUMN 6—Original list price **plus** actual net price increase (Column 5)—If your former ceiling selling price was the same as Lyon dealer list price, the prices in this column are your new ceiling selling prices arrived at by adding to the original March 1942 list prices, the exact amount of the dollar and cent increase in price shown in Column 5.
If your former ceiling selling price is different from the Lyon dealer list price, you may add, by OPA authority, to that ceiling selling price the exact amount of the dollar and cent increase in your cost shown in Column 5, to establish your new ceiling selling price.

Exception: Those articles marked with an asterisk (the items on which no prices are shown in columns 3 and 5), are suspended from price control (Amendment No. 77, MPR-188 and Section 10A, SO-126) and the price for these items shown in Column 6, is a **Suggested Selling Price** (a list price built up from your new net cost on the same basis as our former list price to include a 30% discount).
